New technologies boost efficiency of plastics shredding

Lindner reSource GmbH in Grossbottwar/Germany has further developed its single shaft shredders from the "Apollo" series, especially in terms of their application areas, high throughput capacities and optimal energy efficiency for shredding plastics.

High availability under tough conditions

Strong, reliable, economic: the Apollo model series is ready for your recycling needs. Tailored to companies with low to medium material volumes, the machine enables cost-effective shredding of varying product waste down to defined granulate sizes. The combination of perfected machine technology and intelligent comfort functions guarantees a high degree of operational reliability as well as particularly simple operation and maintenance. Thanks to numerous optional features, the shredder can be tailored precisely to your material requirements. Start shredding efficiently and maintain easily!

High throughput with low drive power

The ongoing development of the square-blade rotor, which is available for the entire "Apollo" series, brings with it a significant improvement in terms of energy efficiency when reducing rigid/hard plastics. The precise positioning of the concave rotor blades with varying blade protrusions ensures controlled and optimized cutting. For example, the Apollo 1000 single shaft shredder can achieve a throughput capacity of 500 kg/h to 800 kg/h with a drive power of only 22 kW.

About Lindner

Lindner reSource GmbH is a member of the Austrian Lindner Group with headquarters in Spittal/Austria. Founded in 1948 as a machine and plant equipment manufacturer, today Lindner ranks among the most competent providers of shredding technology for industrial applications. With approx. 110 employees, the Lindner Group specializes on the development, manufacturing and sales of integrated systems and machines for the production of alternative fuels.

The area of plastics and recycling is efficiently handled by sales and service company Lindner reSource GmbH, headquartered in Grossbottwar/Germany. The company offers high-performance Single Shaft Shredders, Granulators and Wash lines, with throughput capacities of 300 kg/h to 10,000 kg/h for the plastics and recycling industry,
